

Innovation

For top-quality results in factory painting & staining, partner with us.

Not all paints and stains are up to the challenges of factory finishing processes. The situation often calls for an exceptional, innovative coating solution.

- Not all machine coating processes are alike
- Substrate characteristics can interfere with adhesion or uniform coloring
- Application environments are not always ideal
- Weather and temperature variations
- Ability to resist wear in transit and general handling

Eco Stain has been meeting these challenges for over 20 years as a leading stain supplier for major segments of the machine coating industry.

- A true innovator in formulating water-based commercial and factory applied coatings
- Proven performance in the most demanding application environments
- A “true partner” reputation with our customers
- Some of the longest lasting customer relationships in the industry

Partner with Eco Chemical to build the best coating solution for your business needs.

- We understand and respect “cost of goods” and “market pricing” constraints
- We strive for optimum process efficiency along with the best possible finished product
- We provide ongoing technical and trouble-shooting support
- All of our coatings come with the added benefits of safety and easy clean-up
- Better profit margins for you and your accounts

The innovator in eco-friendly paints and stains.
